“THE CIRCLE OF DEATH”

HOW GLOBALISTS ARE SETTING THE PEOPLE UP FOR MASSIVE HARM WITH “SYNTHETIC MARIJUANA”

Invented by John W. Huffman who conveniently retired shortly after inventing JWH-018

China allows production of the chemicals in bulk

The chemicals are shipped to Europe where scientists in the UK formulate the drugs and package them for resale and distribution.

The finished products are transported to Amsterdam for testing in the red light district's infamous club scene. Once they are sure that a chemical will not cause massive loss of life they distribute said chemical worldwide, primarily in the United States and throughout Europe. It is estimated a \$7 billion a year business, but the CHA believes those numbers are grossly underreported and the real number is closer to \$21 billion.

The drugs are sent to Canada or Central America for distribution labelled as “RESEARCH CHEMICALS” into the United States under NAFTA and CAFTA.

The drugs land up in headshops, gas stations, and retail outlets all over America. They are labelled “NOT FOR HUMAN CONSUMPTION” in order to beat legal loopholes.

The chemicals cannot be made illegal because they are synthetic. The formula can and will always change keeping the chemical above the law.

ALL OF THE GLOBAL LOOPHOLES ARE IN PLACE TO DISTRIBUTE AN EXTRAORDINARILY DANGEROUS INDUSTRY AND WE NEED THOSE LOOPHOLES CLOSED!

ONLY PUBLIC AWARENESS CAN PREVENT SYNTHETIC MARIJUANA FROM TAINING OUR INDUSTRY FURTHER.
